

AuthManager::AuthManager

```
graph LR; A[AuthManager::AuthManager] --> B[AuthManager::cleanExpiredCodes]; A --> C[AuthManager::initDatabase];
```

The diagram illustrates a class `AuthManager` with a method `AuthManager::AuthManager`. This method is shown to call two other methods: `AuthManager::cleanExpiredCodes` and `AuthManager::initDatabase`. The source method is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the calls.

AuthManager::cleanExpired
